ARDMS Unveils New Ultrasound Careers Web Site

(ROCKVILLE, MD, January 11, 2006) --- In response to the growing need for information on careers in sonography, ARDMS has created a new informational Web Site, www.ultrasoundcareers.org, for prospective students and allied healthcare professionals. The Ultrasound Careers Web Site is now available as a comprehensive resource for individuals considering a career in diagnostic medical ultrasound (sonography).

The site also aims to educate the general public on the exciting, and constantly changing, field of diagnostic medical sonography. It includes general articles providing information on what an ultrasound professional does, what the different specialties are, what education one needs to enter this field, average salaries, and much more.

In addition to information about a career in diagnostic medical sonography, the site offers a helpful career center, testimonials ultrasound professionals, and links to other sites that may be useful for site visitors. ARDMS anticipates that this site will help create more interest in the field.

We are proud to present this exciting new site, and we hope that you will use it and recommend it to others. The site can be accessed at www.ultrasoundcareers.org.

###

The American Registry for Diagnostic Medical Sonography (ARDMS), incorporated in 1975, is an independent, nonprofit organization that administers examinations and awards credentials in the areas of diagnostic medical sonography, diagnostic cardiac sonography, vascular technology, and physician vascular ultrasound interpretation. ARDMS credentialing programs are accredited by ANSI-ISO 17024 and the National Commission for Certifying Agencies (NCCA). ARDMS has over 48,000 certified individuals in the U.S., Canada and throughout the world and is considered the global standard in medical ultrasound credentialing.
